COMBINING EQUIPMENT

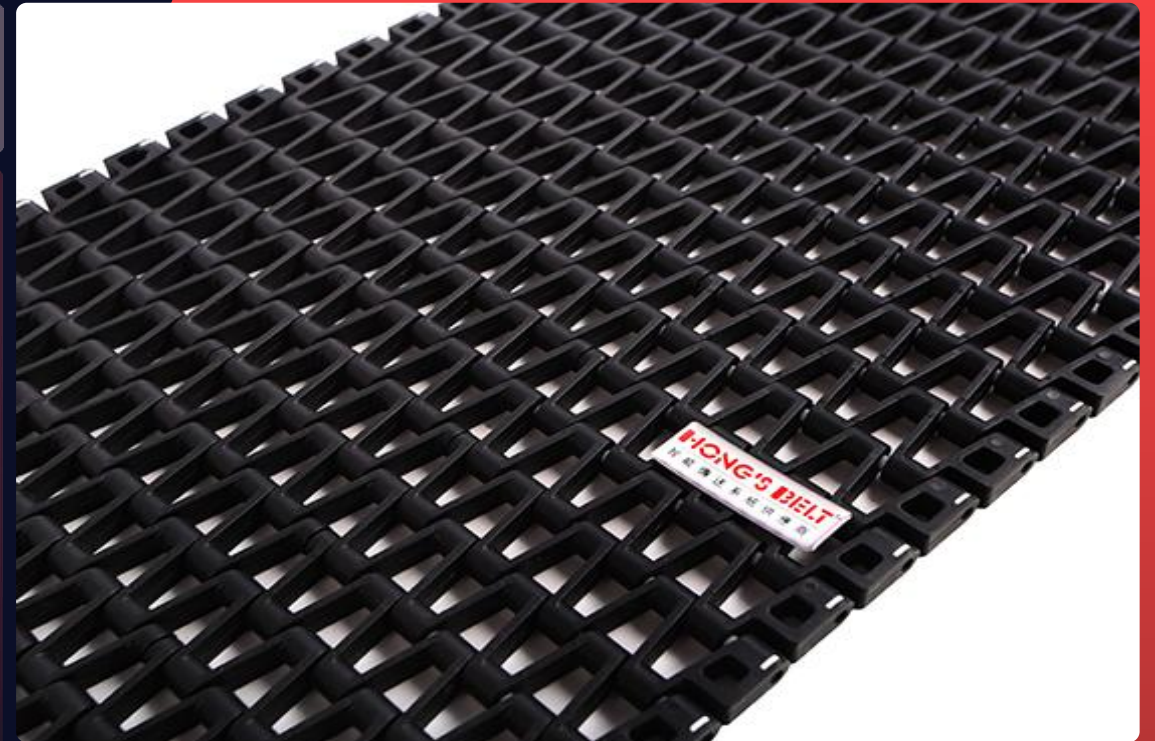

FDA certification

Multiple Domestics in One Using HONG'S BELT TECHNOLOGY

Our conveyor solution "from packaging machine, palletizer, 90-degree transfer conveyor, flat panel turning conveyor, etc." program, you can combine multiple equipment on the beverage line as a set of machines. Especially for complex areas with multiple feed and discharge ends. Including the modules used on the equipment, we can perfectly replace other brands of products.

HONG'S BELT's beverage industry solutions include:

- Perfectly compatible with other brands of mod belts
- Various functional types of conveyors independently produced and developed
- Reduce upfront investment and total cost of ownership

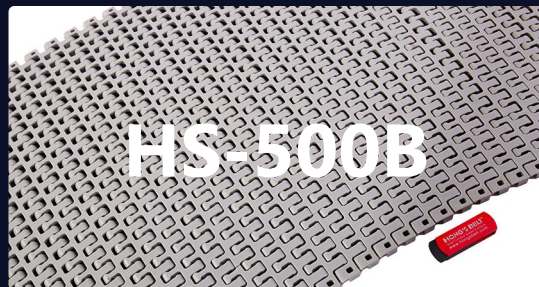

Super Wear-Resistant - Super Long Life

ACCUMULATION

HONG'S BELT PASTEURIZER
BELTS

HONG'S BELT direct drive screw conveyor system adopts self-developed operating system, which makes the side of the modular belt directly engage with the rollers, avoids slipping and significantly reduces the tension of the conveyor belt.
Our modular belts are widely used in bi-directional screw conveyors and platform accumulation solutions

- Multiple entrances on different floors can be customized
- Support multi-unit stacking
- Small footprint, large stacking capacity
- Lower energy consumption than combined vacuum lifter and tank platform
- Zero back pressure on the can body to prevent damage to the can
